

Dusti Johnson

Board of Directors

A native of Montana, Dusti grew up on her family's ranch in the Mission Valley. She brings a diverse background that includes an M.S. in Chemistry, a Bachelor of Science in Business, and experience running a commercial cow-calf operation. She has started and owns several unique businesses and has spent twenty-five years as a Materials Scientist for the State of Montana. In that work she has traveled and served both internationally and throughout the United States, working hard to improve human health and the environment.

She still finds time for her passion for horses. Though new to the club, she cares deeply for the Treasure State Cutting Association and the value it brings to people in our cutting horse community. She offers strong listening skills, a balanced approach to new and innovative ideas, and a positive attitude that she believes will further benefit the club. With your vote, Dusti's enthusiasm, energy, and dedication will add value as a board member.
