

Marcia Cantrell

Board of Directors

I've been cutting since 2007 and a TSCHA member off and on since 2014. As a licensed Veterinary Technician, equine health and safety are central to everything I do. My husband and I run a small breeding program, and every horse I've ever shown in the cutting arena is one we bred and raised ourselves.

As Director, I hope to bring a professional veterinary perspective to event care, cattle handling, and facility standards to ensure the highest quality of equine welfare and safety. I am committed to advocating for grassroots competitors and amateur riders while working collaboratively to support our existing membership and welcome new cutters to our association.

I'd be honored to serve as your Director and represent our members and horses. I appreciate your vote!
